IMPORTANT TO THE PUBLIC! THE following advertisement was published in May, 1849, in the "Boston Daily Times," and various other newspapers in the United States, by James G Wilson, Fajthe owner of the "Woodworth Raient," shortly after I have advertised my "FATENT STATIONARY CUTTER PLANING, TONGUEING, AND GROOVING MACHINE, throughout the United States: "PHANING MACHINES.

"I take this method of answering the frequent inquiries, by liter and otherwise, as to my opinion upon the various notices through the papers, of the stationary Knite Planing Machines attempted to be palined oil upon several persons ignorant af their true work. I would state for the information of the enquirers that they will find substantially the machine non oilered by several pretending inventors, described in the 10th volume of the Repettory of Arts, invented by Samuel Benthan, in the year 1791. Alke machine now oilered by several pretending inventors, described in the 10th volume of the Repettory of Arts, invented by Samuel Benthan, in the year 1791. Alke machine was patented in this country by one Kugler, some six teen years sunce, and another one put up by Albert Richards, of West Troy, N. Y. and abandoned about the same time. It ought to shalp, the pubpoes contemplated.

I will furnish a Stationary Knife Machine qual to any now in use, not one of hered by the pretending inventors, at the cost of the involves and fire per center by trouble, JAAPS 6. WILSON.

May 19, 1819

I deny that any person ever saw or heavi of such a machine as mane until I invented the same. Said machine was operated in the month of August, 1818, and no nanchine before this could do so much work, and do a sa well as mins, in reply to the above absertisement, and in order that the public may be assured that I mean what 1say, I will offer to pledge Ost. THOUSAND DOLLARS against an equation out from said Wilson, that Oxfe or my machines will plane, or plane, tongua and go soe with easy lower, as much lamber in the arms of the arms of the set, beauting and content and of the swell, or better than TWO of the arms of the arms as the other place as may be coolding. Mass, or as such other place as may be coolding. Answer as much small and the state of the set may be as may be compared to the such as a read or as such other place as may be coolding.

GOVERNOR'S MESSAGE.

Gentlemen of the Senate and Assembly:
It is made the duty of the Executive of this
State, by the Constitution, "to communicate to
the Legislature, a tevry session, the condition of
the State, and recommend such matters to their further consideration, as he may deem expedient."

dient."

Having entered upon the discharge of the du-ties of the office so recently as the 5th day of the present month, it will be perceived how impossi-ble it will be for me to communicate the condi-tion of the State from the transactions of the past

tion of the State from the transactions of the past year, about which I cannot be expected to have any personal knowledge; and I am only able to discharge the duty at all, by a very brief examination of the books and papers of the Executive office, and the reports recently made from the various Departments of State.

From the very short time allotted me, for the preparation of this, my first message to the Legislature, I shall ask your indulgence, if the consideration of the affairs of the State Government shall be less general and various than would otherwise be usual in such cases; and shall feel excused under the circumstances, if such matters cused, under the circumstances, if such matter only as are of the most marked and obvious in only as are of the most marked and obvious in-terest to the State at large, are herein noticed and presented. You will have before you all the re-ports for the past year, which have been made by the officers laving the control of the financial concerns of the State, so that, by a thorough and careful examination of the details, any apparent defects in the matters of this communication may be cured and supplied.

From the reports of the Treasurer and Scereta-ry of State, herewith presented, it will be seen.

ry of State, herewith presented, it will be seen that the fiscal concerns of the State, for the year ending 31st of December, 1851, are not in a very ending 31st of December, 1831, are not in a very creditable condition. By reason of the want of funds, available for such purposes, in the hands of the Treasurer, the allowances and special appropriations made by the last Legislature, and the ordinary and current expenses of the year provided by law, and otherwise estimated, have not been paid, within the sum of \$33,283.29.

Convolativis baye been made, whether with or

unts have been made, whether with or Complaints have been made, whether with or without truth I have no means of assertaining, that loans of the School Fund have in some instances, been made upon insufficient securities.—Too much care and watchfahress cannot be extricted by the Legishture, by the adoption of every practicable precaution, to protect it from loss or even hazard; and if any danger may be reasonably apprehended, that this fund, or any portion of it, may be lost to the State, an examination into by apprehended, that this fund, or any portion of it, may be lost to the State, an examination into the matter should not be delayed. Neither the Legislature or the Executive has at present any legal means of knowing what is the character of these securities. I would therefore suggest to the the escurities. I wont interconsumes to the Legislature the propriety of providing for the appointment of a suitable commission to make personal and rigid examination of the titles to the lands mortgaged to secure these loans in the different Counties where they have been made, and terent counties where they have been made, and report at such time, and in such manner as it may be deemed expedient. It may be, that further Legislation is necessary to require the Board to be more certainly assured of the goodness and validity of titles to the lands offered in security, than is now required, before making leans upon them. If so, such Legislation should at once be smolled.

The Board of Regents of the State University, The Board of Regents of the State University, berewith present to the Legislature, their fourth annual report, exhibiting in a clear and concise manner, the progress, condition and wants of the institution under their charge. To this report, and to the well advised suggestions therein contained, relative to the administration of its affairs, your attention is particularly invited.

To carry out the clear intent and meaning of your attention is particularly invited.

To carry out the clear intent and meaning of that clause of the Constitution relating to this subject, and the beneficent objects of this department, I hope the Legi-slature will see proper to the building, and the perfection of the organization of the Normal department of the University.

versity.
It seems to be the manifest design of the law the seems to be the manifest design of the law under which the University is organized, and the purposes and objects of the Normal department charly indicate, that this department is not so much a necessary part of the University organization, as it is an adjunct and admitistry to the common school system, the charge of which is generously assumed by the authorities of the University—its design and object being singly, to qualify teachers for the common schools. Their request for aid, therefore, to perfect and support qualify teachers for the common schools. Their request for aid, therefore, to perfect and support this department from the common school fund, seems to be reasonable and just. In receiving the generous grant of the government of a large and ample fund for the support of common schools, and by the express terms of our Constitution, we have committed ourselves to the policy of Free Schools. Our system, then is a system of Free Schools, and we have but one system, into however many different departments. is a system of Free School, and we have out one system, into however many different departments it may be divided for convenience and efficiency, and this is made an institution of the whole State, without reference to sections or localities, and intended to benefit all classes—the poor as well as

the rich, and that too without respect to religious the rich, and that too without respect to beinglous distinctions.

In these respects, this object presents itself to us essentially different, from an application for aid from the State to benefit institutions of learning, or of any thing else, local in their character, and under the centrol of private persons or corporations. The leaning of the school fund to individuals upon lauded scentities, under our present law, is, to say the least, questionable policy, not only on account of its great liability to less in many cases, but because also, it is only partial in its benefits. Those only, who are rich and able chough, or rather those who are the owners of land sufficient to give the requisite security, can obtain any portion of it. Its true this immense capital, by being leaned out in this way, enters

pose of a Teacher's Institute. This Report shows that the income of the School Fund, apportioned Feb. 10th, 1851, amounted to over \$30,000, and that the amount next to be apportioned will ex-ceed \$70,000. The number of scholars attendeccd \$70,000. The number of scholars attending school in 1849 was reported at 32,174. The number reported for the past year is 73,944, being an increase of ever 100 per cent. For other valuable statistical information relating to the common schools of the State, I refer you to said

report.

From the report of the present Board, it will appear that during the last year at least, this Inprovement has been as economically and judiciously managed as could be required. But the manner in which the large amount of the proceeds of previous sales of this grant has been expended, I am not able, from the short examination I have given this subject, to inform you.

It would seem advisable that a rigid investigation of the condition of this Improvement be made without delay, that it may be ascertained who deserves the credit for the management, or who should bear the responsibility for the mismanagement of this large and valuable trust fund; and if it should be found that this fund, or my portion of it has been squandered, embezeled, or otherwise misapplied, those involved in the guilt should be at once proceeded against for the offence defined in the 29th Section of the act relating to this Improvement. The Legislature will take such measures in the premises as may be thought accessary and proper.

In pursuance of an act approved March 11th, 1851, His Excellency Gos. Dewey, on behalf of the State, accepted the proposition, and entered into contract with Morgan L. Mantin, 1842, on the 14th day of May, 1851, for the Improvement of the Fox River between Lake Winnebago and Green Bay, since which time there has been issued to said Martin for labor done upon said contract, by the Board of Public Works, scrip to the amount of \$26,000 00, appended to which are the signatures of the Governor and Secretary of State, and the Great Seal of the State. Said scrip and certificate are in the following form, as taken from the contract:

peal for aid from the State, will doubtless meet with a favorable response from the Legislature. In pursance of an act of the last session of the Legislature, His Excellency, Governor Dewey, appointed three Commissioners to locate the State Prison. Wher upon said Commissioners, or a majority of them, proceeded to examine several localities, and located the Prison at Waupun, in the County of Dodge. The report of a majority of said Commissioners, as well as the minority report of A. W. Woth, Esq., the other Commissioner, as he research, and your attention invited.

Inoity report of A. W. Worth, E-a., the other Commissioner, are herewith presented, and your attention invited.

Appreciating as I do, the many and superior advantages of a residence, and a common interest, with the people of Wisconsin, and believing that as a State, is point of soil, climate, mineral wealth, water communication, and position, as well as health, means of Education, and of a rapidly increasing population of intelligence, industry and enterprise, we possess great natural facilities and numerous blessings—I would desire to see such a State Policy adopted, as would make available all our resources, and means of improvement, and render us, to as great an extent as possable, independent of all foreign aid, except the bonefits of markets and commerce.

I would therefore advise the adoption of the following measures, as conducive to this end:

1. To Memorialize the Congress of the United States, to cause all the Agricultural lands within this State to be surveyed, and brought into market, at as low a price, and as specifily as practicable; thereby inducing their occupancy and cuitivation, increasing the list of taxable property, and lessening the burden of taxation.

2. To cause all the mineral lands in the State to be surveyed and geologically examined, and offered for sale; thereby incommend the settle.

not but think that Wisconin has a diffect and VItal interest.

6th. To so modify the prisent Tariff apon imports, and adopt such a system of discinninating
duties, as will, while it produces the necessary
amount of Government revenue, afford adequate
protection to the agricultural, mechanical and
manufacturing labor of our own Country. Intimately connected with our agricultural interests,
and upon which their success in a great degree
depends, is to have a good, sare and convenient
market for the staple productions of our suil—not
a market fluctuating and temporary, but as fixed
and permanent, as it is possible, under any circumstances, and as the ordinary relations of supply and demand will allow. Such a market we do
not now have out of our own Country. We sometimes have a foreign demand, when there has
been an entire or partial failure of crops in some
grain growing country of Europe: but this isonly
occasional, and country be depended upon, as in
the present year, when the harvests abroad have
been abundant. If then, we cannot expect to
have such a market abroad as we require for our
produce, it becomes us to endeavor to find or
create such an one at home and within our own
country. How then can this great desideration
be effected? Those parts of the Country not of
suitable soil or clunate for agricultural purpose,
but yet possessing the capital, the hydraulic
power and all other necessary means for manufacturing, such as the New England and some
other States, if adequate protection were afforded, would engage largely in this branch of industry, and by the comployment of municious laborcreate such as the other manual force as would be
necessary to conduct it, there would be created
in our own Country, a constant demand and centain market, for our surplus produce, and at the
same time we would receive the reciprocal benefits of their skill, capital and trade. The true
conomy of the farmer, is to sell as much, and
hy is litle as he can; and 1 sec no reason why

buy as little as he can; and 1 see no reason why that is not also the wisest coromy for our nation. Whenever this County imports an excess, over her exports, we say the blance of trade is against us, or in other words, we are doing a loosing blueiners. The only way to remedy this, is never to buy and import from abroad, unless we can sell and export at least to an equal amount. Other or Countries have long acted upon this plan towards us, and so long as they continue to do so, we are paying a tribute to them, without an equivalent; and are compelled to adopt the same plan, for self defence. A low tarill, or free trade, if they should be adopted by all the Countries within the range of our connected intercourse, would be far less objectionable. But this can never be expected, for just as soon as one Country alopte this plan, the others would have the stronger interest to continue their Tariff duties at a high standard, so as to avail thenevies of the benefits of a free market in that Country, without being

this plan, the others would have the stronger interest to continue their Tariff duties at a high standard, so as to avail themselves of the benefits of a free matket in that Country, without being compelled to recipreate the advantage. It can be easily seen from this, why other Countries are constantly advising us to adopt towards them, the principle of free trade, yet never propose to practice the same principle towards us.

The amendment to the act, approved Feb. 12th, 1733, relating to persons escaping from their massure under the control of non-resident money ters, and one of that series of mechanes passed by the 31st Congress, commonly called the "Compromise Measures," from the effect its passage and enforcement has produced upon the public mind, may well morit your serious consideration, as the representatives of the people of the State.

After a careful examination of the provisions of the state, and nearly allalong the line, or in the vicinity of the great Fox and Wisconsin river thorough in this law, aside from the question of its constitutionality, I am prepared to express my own opinion, that in many of its features it is highly objectionable and unjust; and I am in favor of cities have been associated to concede that the passage of this law became absolutely necessary to the prevent of the government; but I am not prepared to concede that the Federal Union has become so weak, that its existence depends upon the enactment or repeal of any mere statute, or the state of the purpose of constructing works in other and distant parts of the State, in which they are but little, if at all, interested, and it would called into requisition, and are abundantly efficient for the purpose of our government are properly called into requisition, and are abundantly efficient for the purpose of our government are properly called into requisition, and are abundantly efficient for the purpose of our government are properly called into requisition, and are abundantly efficient for the purpose of conforcing the execution

from the Government, as well as the 10th section of the finance article of our State Constitution, and whether the good inith of the Stato is not thereby pledged for its ultimate payment—I cannot see that it is anywhate contemplated by the grant, that this Improvement shall ever pass into the hands or under the control of creditors who may have advanced money to construct it, and in this manner the State hecomo divested of its authority over it.

The report of the Adjutant General of the State, on the subject of military affairs, has not vert transpired, and I cannot therefore lay before you may panticulars in relation to this department. In consideration of this subject, however, it is humbly submitted, that unless thus general organization of the militian promises to afford benefits proportionate to the complicated and various duties, expenses and consumption of time it involves, or unless required by some present necessity, the policy of its continuance may well be formable under the grant state, in each of the present in the money required for this general organization, he more profitable for this general organization, he more profitable for this general organization, he more profitable for this general organization of the Dilutal time and money required for this general organization, he more profitable for this general organization, he more profitable in the profits of this institution for the Education of the Blind." From the very worthy and humane objects of this institution, their appeal for aid from the State, will doubtless meet.

In pursuance of an act of the last session of the Legislature, it in a froorable response from the Legislature, the Legislature, it in a froorable response from the Legislature, the Legislature, the Legislature, it in a froorable response from the Legislature, the power is thereby given to the present Legislature, the power is thereby given to the present Legislature, and the last session of the bill holder." The popular result of the safety of the bill holder." The popular such restrictions and under such regulations as they may doem expedient and proper for the safety of the bill holder." The popular result upon this question meets with my cordial acquescence; and I would therefore recommend that the legislature at its present session, take such measures as they may think advisable to carry into tifice, this constitutional provision, and as will comply with the propour wish. Although "the power" is given "togrant bank chartes," I would not advise the creation of Banks in this form, being opposed to all class and special togistation. The voice of the people having been so recently expressed upon this subject, I doubt not, it will be properly and duly regarded by the Legislature.

I would not advise the creation of Banks in this form, being opposed to all class and special injectation. The voice of the people having been so, the corresponding to the State, and their way to maket, thereby treating a banking law, every safeguard and presention should be made to incure the safety of the bill holder; and no basis less safe than United State or State Stocks, deposited at the lowest cash and market value, and varying interest cash and market value, and practicable.

In the entire absence of legislation upon this subject, some provision should be made at the pre-ent session, for procuring stationery for the Ediction provided in the consequent burden of taxation under our products an object, some provision should be made at the pre-ent session, for procuring stationery for the Ediction provided in the consequent burden of this matter, added to the already great multiplicity of duties that properly belong to the Executive office.

The expenses and taxes of the different counties in the State, I am confident would be greatly diminished, by the adoption of the Commissioner system of Ohio or Indiana, in place of our present organization, besides being less complected and more efficient.

It will be your duty at the present session to apportion and district anew the Members of the Senate and Assembly according to the number of made by the authority of the United States in the year 1550.

The policy of Congress granting the vacant and unsold lands lying within this State, to aid in the construction of works of internal improvement, and they should be grantically adopted, I have endeavored carefully to examine and consider; and I am clearly satisfied that the policy is wrong and destrict and subside and reduced the regulations usually adopted, I have endeavored carefully to examine and consider; and I am clearly satisfied that the policy is wrong and destrict and substrate purposes. for side. If granted, as is usual in such cases, in alternate sections, the practice has been and will probably continue to be, to increase the price of the government lands so alternately reserved, thus making the land both granted and reserved, a profitiless bangain to the empitalist, as well as placing them beyond the reach of a charge proportion of emigrant settlers, who would otherwise become resident producers in the State. The consequence would be, they would avoid Wisconsin and seek more favorable locatures in other States and Territories, where vacant lands could be procured at the usual govern'int price. If a grant be made for the benefit of only one certain work, or a particular company, and no other should be allowed, it would be objectionable, as contening a special and exclusive benefit upon a particular section of the would be objectionable, as contening a special and exclusive benefit upon a particular section of the State, out of a general and common fund that belongs to all portions and sections of the State alike. If one grant should become a precedent reason for allowing others, and grants should continue to be made as often as my work or improvement could be demonstrated to be of utility and importance to any section of the country, in a very short time all the public lands in the State would be absorbed and rugrossed by numberless projected internal improvements, each under the management of special and private companies, and all requiring the supervision of the State Government. The companies laving charge of these various works, would, or might, consider it for their interest to make such a high apparisement of these grants as would necessarily keep them a oon as the reading of the document commenced at Madison. We publish it in our regular edition day will bring forth.

At 12 to-day, the Senate was called to order by again this morning. The Message requires little comment. It is of that frank, unpretending, traightforward character, which wins the general car and commands the popular judgment. It picture, of the financial condition of the State; their interest to make such a lingh appraisement of these grants as would necessarily keep them a long time out of market, and prevent their occupancy and settlement. In the mean time, in order to obtain the requisite means to commence and carry on these works, they might see fit to issue bonds, serip, or other evidences of debt, making these lands the basis of their credit and security, and by their sela and page ratio in a feesion. mumerates very fully the measures which the

more immediate interest.

In regard to State policy, the Governor very frankly expresses his views in favor of a General Gray, Clerk of last House. Every member an-Banking Law, with proper restrictions; of grantconsin River Improvement, and the management of the fund provided for its prosecution; of an of the appointment of a Commission "to make work seeming personal and rigid examination of the titles to "the land mortgaged in different counties" to se-cure loans from the School Fund.

The Governor intimates, very plainly, that, in his judgment, the general organization of our State
Militin, is an expensive humbug, and while disposed to encourage, in every suitable way, the fordustry and enterprise, the concentration of enpital by the organization of companies, are not only laudable and proper, but have the countenance and protection of our faws. But monopolies, created by gifts and grants from the government, and capying special privileges, are antigonistic to the spirit of our institutions and should not be ercouraged. If the State, by Legislation, should impose stringent safe guards, conditions and restrictions upon the disposition of these trusts, and art submit them wholly, or exen partially, to the control of the companies to be benefited, it is to be presumed, but few of these grants would be asked or ought. ployed in cultivating the arts of peace." The Governor is not insensible to the deep stake Wisconsin has in encouraging Foreign Immigration, and he arges the Legislature, very carnestly, to adopt such measures as shall secure to this State its fall share of this fertilizing and enriching stream. In regard to questions of National policy the

Mussage is equally explicit. It invites the Legislature to memorialize Congress, for an early survey and sale of all the Agricultural and Mineral Lands in this State; for liberal appropriations to improve our Harbors and Rivers; for the establishment of an Agricultural Bureau at Washington, to romote the great industrial interest of the country; for the free navigation of the River St. Lawrence; and for such a modification of the Tariff as shall furnish adequate protection to Home Labor, while producing sufficient revenue for the uses of the gove ernment. In support of all these recommendation the Governor advances brief, cogent and convinc-

But suppose these Legislative conditions and restrictions would be believed and restrictions would be

gisturise conditions and restrictions would be both proper and practicable. In that case an amount and responsibility of legislation would be imposed upon the State, both burdensome and illegain ate, if not unconstitutional. At the same time the appointment of numerous officers for the safe keeping and disbursement of these bancase tract founds would become necessary, to be paid out of the funds in their own hands, and responsible to the State, thus creating a vast and dangerous power of government patronage, while at the same time these improvements thus placed ander the case and supervision of the State would be merely of local and sectional benefit.

In this connection, I would recommend, that

In this connection, I would recommend, that the Legislature provide by law, for the establish-ment of an Emigrant Agency, to operate both at places of debarkation at the East and in Wiscon-sin; and that shall take proper measures to at-tract emigrants from abroad to Wisconsin, as well

ing arguments. Upon the "vexed question" of the Fugitive Slave Law, the Governor speaks his mind like a nan. He thinks it, in many respects objectionsble and unjust, and desires to see these adious fea-tures expunged, or the Law itself repealed. He does not believe that the fate of the Union hangs so slender a thread as the enactment, or repeal of this statute, but while it remains the law of the land, he holds it to be the duty of every good citi zen to obey it; and so far from encouraging, he untenances all uscless agitation on the subject

of Slavery.

The concluding portion of the Message is deoted to an able and original argument against large grants of the unoccupied Public lands in aid of works of Internal Improvement. It is impossible | will no doubt be a crowd to see and hear these to deny that the reasons adduced by the Governor, in opposition to this policy, are forcible and pertinent, and entitled to great weight both with Congress and the People. The closing paragraph of the Message confirms the general expectation of the People of this State, when they elected LEONARD J. FARWELL GOVERNOR, in the promise t holds out that he will administer the duties of that high office without fear, favor or affection, We have thus hastily passed in review the leadng topics of the Message. Of the document as whole we hear but one opinion on all sides in our city; that of warm satisfaction and unqualified praise. It is a mauly, plain-spoken, business like address, which carries conviction in the ery simplicity of its style and the frankness o its positions and statements, and which does conor alike to the Executive who promulgates it and to the great party whose principles, sympa-

Madison, Jan. 14th, '52. I prote vesterday afternoon, at which time ther comed little probability of any nomination being made in the evening by either party, but calls were out in season, and the Whigs met in the Assembly Chamber, the opposition members in he Senate Chamber. With regard to the latter, t is not to be concealed that, thus far, they have not shown any disposition to make separate neminations, but are "open to conviction," as is the ase with the Free Soilers. It is something of progress for Wisconsin, when we can say of its Legislature that the Democracy "is not in the ascendant," but "in the market." The Whigs n caucus were not as harmonious as might be, hough perhaps quite as much as was to be ex-

pected; for they are generally rather plain-speak-ing people, and allow their likes and dislikes to known without much reserve. There were quite a number of the Whigs who would not have een at all unwilling to coalesce with the Free Soilers and give them the Clerk; but there are also about the same number who, not only would not consent to that arrangement, but would not vote for it in any event, the great probability being that any Whig candidate for Speaker under that arrangement would lose more than he could gain. Under all the circumstances, the conclusion that the cancus came to, was perhaps the best.— They made three straight Whig nominations,-J.

Il. Shafter, of Sheboygan,-a very capable manof fine personal appearance and address, and one who has very much won upon the esteem of the members elect-for Speaker; W. Welch, of Madison for Clerk, a member of our Whig State Com mittee, well known as a reliable man; and our old friend STARR, of Milwaukee, for Sergeantat-Aims. Now these men may not be elected, it is true; but the impression seems to be general that the Whigs have lost nothing by taking such straightforward, manly course.

The democratic cancus met and adjourned as THE GOVERNOUS MESSAGE.

Thank Gop for a Man, in these days, who speaks Thank Goo for a Mm, in these days, who speak without circumlocution, or diplomatic phrase, o party cant, what he has to say, as Governor o Wisconsin, to the Representatives of the People The Message is writen in a plain, unambitious business-like style, and, considering the number and importance of the topics discussed, is a brief as could reasonably be expected.

We cannot refrain from saying, in conclusion, that the Message is highly creditable to the Governor, and does honor to the men who elected him. Free Soilers have no reason to regret their choice, and the Whigs have redeemed themselves from a thousand follies by electing such a man.

Resolved, That our best thanks are also due to Mr. CHARLES H. MATHER, of the City Hotel, for the extreme kindness and urbanity, with which he anticipated their every want and ensured their complete comfort.

Resolved, That Mr. John S. Fillmore, Chief

Engineer of the Fire Department of Milwaukee, and the Officers and Members of Supply Hose Company No. 1, be, and they are hereby elected Honorary Members of this Company.

Resolved, That this Company, on behalf of their delegation, beg leave most respectfully to ender their humble acknowledgements to the Ladies of Milwankee, whose frank kindness threw a charm over the joyous scene, and added the last highest lustre to the brilliant entertainment-if we might dare to venture to enshrine their memory, it should be worshipped as the brightest star

f our hope.

Resolved, That while our deep obligations can never be adequately returned—yet we carnestly tope that Supply Hose Company, as our guests will kindly afford us an early opportunity, for showing that their generous, whole-souled recepion is sincerely appreciated, S. O. EAMES, Foreman.

part of the country. The Country, Arssishpp, Republican says:

We see by reference to the Court reports, that the judgment of \$6,000 obtained by Messes, Taylor, Half & Murdock, of Columbus, Missignant Shelder & Murdock, of Columbus, Missignant Shelder & Murdock, of Columbus, Missignant Shelder & Murdock, of New York, has been confirmed by the higher Court to which Mr. Churken appealed. Mr. Churken was employed by a number of merchants and others in the city of New York, in the year 1846, and previously and subsequently, to travel and inquire into the pecuniary condition, de., of Merchants doing business throughout the country. These reports he forwarded to New York, where they were printed each year, and distributed amongst his subscribers. It was in one of these books that the libel complained of, was published, and for which a judgment for \$6,000 was obtained. This suit is but one of a number that have been commenced against Mr. Churken and his subscribers, and by parties whom we are rejoiced to know will never let the matter rest, till the whole of this infamous system of espionage is exposed and broken up. fet the matter rest, till the whole of this infamous system of espionage is exposed and broken up.—
It has been proposed to publish the names of the firms who support and aid this infamous mode of proceeding, throughout the land, that the country merchants may take warning and shun their houses." The Republican then alludes to the Tappan Trial, and denounces the system in terms of unmeasured severity. It says the New York agencies receive some \$300,000 yearly for the reports they give out; all of which the country merchant has to pay in extra profits on the goods purchases.

irchases.

Must not the country merchants feel proud of Must not the country merchants feel proud of the privilege of aiding in paying this sum yearly for spies and informers to watch them? The Republican adds that the Judge, in the suit against Curucu, concluded with the following highly complimentary observation to the class to which the defendant belongs: "Spies and informers have in all ages been avoided by their fellow men, scouted from the pale of civilized society, and hanged by nations."

from which the above cut was taken. By it we can take the exact shape, and unoringly fit the most irregular heads. Many can testify to the inconcenence, and annoyance, and actual pain they are subjected to, in breaking in Hats that will not fit them. By this ingenious contrivance, this very great annoyance is done away; as the Hats are made to fit perfectly the first time.

Another great advantage is, by keeping a copy of the impression, we can at all times fit our customors from all parts of the country.

We invite all who desire a perfect fit in a Hat, to call and leave an impression of their head; and all those who take pleasure in witnessing the inventions of the curious instrument.

Having adopted the Class System (which all spill readily acknowledge to be the best,) we are enabled to sell the best Silk Hat made, at the extreme low price of \$1.25, surpassing any \$5 Hat sold in this city. Our Hats are all manufactured by cursalver, and in offering them to our customers, we do so, with the confident assurance, they are all we recommend them to be we invite all who do not wish to pay two profits upon a Hat, and are willing to save 25 per cent, to call and see us
